Portfolio: https://aatheeshkumaran.github.io/dev_portfolio/

PROFESSIONAL SUMMARY

Motivated BE Computer Science student (2026) with a strong foundation in web development, Python, and modern frontend technologies. Skilled in designing and developing responsive, user-friendly web applications with knowledge of UI/UX principles and backend development. Passionate about learning emerging technologies, solving real-world problems, and building innovative software solutions through continuous learning and practical experience.

WORK EXPERIENCE

WEB DEVELOPER INTERN | FRAZON DIGITAL MARKETING

Feb 2025 - Aug 2025

- Designed and developed responsive business websites using HTML, CSS, JavaScript, and modern web development practices.
- Collaborated with the design and marketing teams to implement user-friendly, visually appealing interfaces aligned with client requirements.
- Optimized website performance, responsiveness, and cross-browser compatibility to improve user experience.
- Maintained and updated existing websites by fixing bugs, enhancing functionality, and implementing new features.
- Worked with Git and followed structured development workflows to deliver projects within deadlines

PYTHON FULL STACK DEVELOPER INTERN | CARREER LADDER

Jan 2026 – Jul 2026

- Developed full-stack web applications using Python, Django, HTML, CSS, JavaScript, and SQL.
- Built and integrated RESTful APIs to enable seamless communication between frontend and backend components.
- Designed and managed relational databases, implementing CRUD operations and authentication modules.
- Developed responsive user interfaces while ensuring application performance, security, and scalability.
- Participated in debugging, testing, and deployment activities, contributing to the successful delivery of web applications.

PROJECTS

Jarvis AI Personal Assistant — Python · Hugging Face Transformers · NLP · Automation

- Developed an AI-powered desktop personal assistant using Python and Hugging Face language models for natural language interactions.
- Implemented system automation features to launch desktop applications, execute user commands, and perform productivity tasks through text-based prompts.
- Integrated conversational capabilities including question answering, joke generation, and general assistance to enhance user experience.
- Designed a modular architecture to enable future integration of additional automation features and third-party APIs.

Personal Productivity Tracker — Python · HTML/CSS · JavaScript · Django

- Developed a personal productivity tracker for scheduling daily tasks, monitoring progress, and managing activities through an intuitive interface.
 - Implemented task creation, status tracking, and progress monitoring features to improve productivity and organization.
 - Built an analytics dashboard that summarizes completed, pending, and overdue tasks, providing users with actionable productivity insights.
 - Designed a responsive and user-friendly interface with secure data management and CRUD functionality.
-

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Bootstrap 5, Responsive Web Design, REST API Integration

Backend: Django, Django REST Framework (DRF), Python

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, Figma

UI/UX: Wireframing, Prototyping, User-Centered Design, Responsive Design

Concepts: Object-Oriented Programming (OOP), MVC Architecture, CRUD Operations, Authentication & Authorization, RESTful APIs

EDUCATION

BACHELOR OF ENGINEERING IN COMPUTER SCIENCE AND ENGINEERING

2022 – 2026

Nehru Institute of Engineering and Technology, Coimbatore | CGPA: 7.4

CERTIFICATIONS

- Blockchain Basics — Coursera, 2025
- Blockchain and Its Applications — NPTEL (IIT Kharagpur), 2025
- Python for Data Science — NPTEL (IIT Madras), 2025
